SALVAGING EQUIPMENT INSPECTION LIST

Date:

o.	Description	Unit	Quantity				Inspection Record				Remark
			Current	Original	Increase	Decrease	Brand New	Available	Repair Needed	Wasted	

Remarks:

1.    The No. column should be filled in with the numbers that are registered when the salvage operator makes registration. Give a  
  
        number to each equipment but if there are more than two pieces of same equipment, number the others with a sub-item  
  
        number such as No. 1-1, 1-2 and so on.

2.    Current quantity in the quantity column may be zero, which means that the existing quantity (of the last inspection) should be  
  
        recorded even there is nothing currently.

3.    If needing to re-issue labels, please so indicate in the remark column.

4.    The inspection records are left for use by port authorities.
