

Appendix 6

Table of Maintenance Fee for Pre-embedded Circuit Casings

Maintenance Fee for Pre-embedded Circuit Casings (New Taiwan Dollar/NT\$)

Formula for Calculation:

$$\text{Annual Usage Fee (NT\$ / Year 公尺 Meter)} = \text{Annual Total Maintenance Fee (NT\$)} \div \text{Total Length (Meter)}$$

Note:

1. Maintenance fee for pre-embedded circuit casings is to be collected from pipeline organizations (institutions) which access circuit casings that are pre-embedded in the parks.
2. Annual Maintenance Fee: The expenses for maintaining pre-embedded circuit casings are computed by the average of the expenses for the three (3) preceding years of the base year of application. If there is no information on expenses for the three (3) preceding years while the pipeline construction is completed, the Administration shall estimate expenses on the basis of actual situations.
3. Total Length: Total length of the pipelines pre-embedded in this park.
