

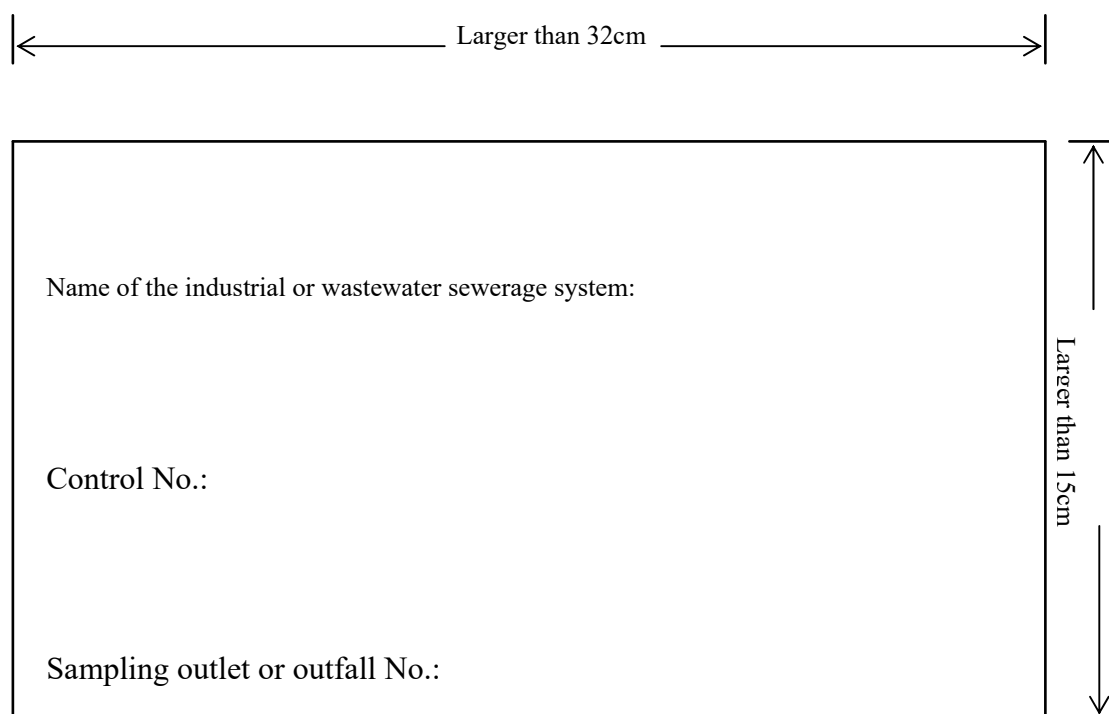

Figure 1. The billboard format for the sampling outlet or outfall

Note: According to the Google GPS coordinates (WGS84 latitude and longitude), it is recommended to use a cell phone with GPS function and enable the GPS positioning function by clicking “Options” on the menu screen of camera software to enable the “geographic label (or geographic mark)” function, for taking photos at the location of sampling outlet or outfall. Click on "detail information" of the photo to read the GPS coordinates (latitude and longitude) of the location where the photo was taken.
