

## Appendix VIII Distribution and Delivery Standards

1. Medical institutions must establish, and follow written procedures for the control of distribution of PET drug products to ensure that the method of shipping chosen will not adversely affect the identity, purity, or quality of the PET drug product.
2. The distribution in the previous paragraph 1. of this appendix must maintain records for each PET drug product that include or refer to the following:
  - 2.1 The name, address, and telephone number of the receiving facility, and the name, title and department of the recipient.
  - 2.2 The PET drug product name, lot number, control number, or batch number, distribution date and time, and quantity of each receiving facility.
