

## Appendix

### List of Pathogens and Laboratory Test Methods for Laboratory Surveillance and Advance-Alert System

Pathogen	Laboratory Test Method
<i>Listeria monocytogenes</i>	1. Isolation and identification; molecular diagnostics; antigen 2. Antimicrobial susceptibility testing
<i>Salmonella</i> species	1. Isolation and identification; molecular diagnostics; antigen 2. Serogroup 3. Antimicrobial susceptibility testing
<i>Streptococcus agalactiae</i>	1. Isolation and identification; molecular diagnostics; antigen 2. Antimicrobial susceptibility testing
<i>Streptococcus pneumoniae</i>	1. Isolation and identification; molecular diagnostics; antigen 2. Antimicrobial susceptibility testing
<i>Streptococcus pyogenes</i>	1. Isolation and identification; molecular diagnostics; antigen 2. Antimicrobial susceptibility testing
<i>Yersinia enterocolitica</i>	1. Isolation and identification; molecular diagnostics; antigen 2. Antimicrobial susceptibility testing
<i>Campylobacter</i> species	1. Isolation and identification; molecular diagnostics; antigen 2. Antimicrobial susceptibility testing
<i>Mycobacterium tuberculosis</i> complex	1. Isolation and identification; molecular diagnostics; antigen 2. Antimicrobial susceptibility testing
Influenza virus	Isolation and identification; molecular diagnostics; antigen
Parainfluenza virus	Isolation and identification; molecular diagnostics; antigen
Respiratory syncytial virus	Isolation and identification; molecular diagnostics; antigen
Rotavirus	Isolation and identification; molecular

<b>Pathogen</b>	<b>Laboratory Test Method</b>
	diagnostics; antigen
Enterovirus	1. Isolation and identification; molecular diagnostics; antigen 2. Antibody
Coronavirus	
Hepatitis B virus	1. Isolation and identification; molecular diagnostics; antigen 2. Antibody 3. Alanine aminotransferase (ALT) levels
Hepatitis C virus	1. Isolation and identification; molecular diagnostics; antigen 2. Antibody 3. Alanine aminotransferase (ALT) levels
