

法規名稱：EXCHANGE OF LETTERS BETWEEN CCNAA AND AIT CONCERNING THE ARRANGEMENTS OF ENVIRONMENT GRANT (AD.1987.6.11)

簽訂日期：民國 76 年 06 月 11 日

生效日期：民國 76 年 06 月 11 日

Mr. Raymond S. H. Hoo

Chairman

Coordination Council for

North American Affairs

133 Po Ai Road

Taipei

Dear Mr. Hoo :

The American Institute in Taiwan's Washington office and the United States Trade and Development Program (TDP) have signed a grant agreement in the amount of US\$900,000 to fund a variety of activities in support of the efforts made by the authorities represented by the Coordination Council for North American Affairs (CCNAA) to improve its environment. The objective of the grant is both to assist with environmental protection in Taiwan, and to introduce U.S. environmental technology and products. Thus, activities under the grant should assist our mutual efforts on both environmental and trade matters.

The Grst activity under the environmental grant was our very successful waste management symposium, held last month at the American Trade Center in Taipei.

We have been asked to do further symposia on environmental questions, and these events are being considered.

These symposia are just part of our efforts. The major thrust of the grant is to finance specific feasibility or pre-feasibility studies, and we are currently proposing two such studies. The first is a thorough examination of hazardous or toxic waste treatment, storage and disposal in Kaohsiung. This study would be based on a TDP--financed definitional mission performed last year with the help of Kaohsiung authorities. The second study, beginning with a definitional mission, would also focus on hazardous

or toxic waste. This study would be performed with the Bureau of Environmental Protection in the Department of Health.

TDP has agreed to send two experts to assist the Department of Health in finalizing the terms of reference for the study and in determining the necessary funding.

The contracts for the studies will be between AIT and U.S. environmental consulting firms with related terms agreed by the Department of Health.

However, the selection of the U.S. consultants and the monitoring of work progress will be the responsibility of the Kaohsiung authorities and the Department of Health for the studies under their respective jurisdictions. As mentioned above, preparation of the terms of reference is done jointly. Technical arrangements for the studies would be

handled between AIT staff and personnel in Kaohsiung and at Department of Health. AIT will provide them and CCNAA with information on the appropriate TDP rules and regulations pertaining to procedures for competitive selection.

Sincerely,

[Signed]

David Dean

Mr. David Dean

Director

American Institute in Taiwan

Taipei Office

Dear Mr. Dean :

I have the honor to acknowledge receipt of your letter (AIT B-410) dated June 11, 1987, which reads as follows :

The American Institute in Taiwan's Washington office and the Un-

ited States Trade and Development Program (TDP) have signed a grant agreement in the amount of US\$900,000 to fund a variety of activities in support of the efforts made by the authorities represented by the Coordination Council for North American Affairs (CCNAA) to improve its environment. The objective of the grant is both to assist with environmental protection in Taiwan, and to introduce U.S. environmental technology and products. Thus, activities under the grant should assist our mutual efforts on both environmental and trade matters.

The first activity under the environmental grant was our very successful waste management symposium, held last month at the American Trade Center in Taipei. We have been asked to do further symposia on environmental questions, and these events are being considered.

These symposia are just part of our efforts. The major thrust of the grant is to finance specific feasibility or pre--feasibility studies, and we are currently proposing two such studies. The first is a thorough examination of hazardous or toxic waste treatment, storage and disposal in Kaohsiung. This study would be based on a TDP-financed definitional mission performed last year with the help of Kaohsiung authorities. The second study, beginning with a definitional mission, would also focus on hazardous or toxic waste. This study would be performed with the Bureau of Environmental Protection in the Department of Health.

TDP has agreed to send two experts to assist the Department of Health in finalizing the terms of reference for the study and in determining the necessary funding.

The contracts for the studies will be between AIT and U.S. environmental consulting firms with related terms agreed by the Department of Health.

However, the selection of the U.S. consultants and the monitoring of work progress will be the responsibility of the Kaohsiung authorities and the Department of Health for the studies under their respective jurisdictions. As mentioned above, preparation of the terms of reference is done jointly. Technical arrangements

ts for the studies would be handled between AIT staff and personnel in Kaohsiung and at Department of Health. AIT will provide them and CCNAA with information on the appro-Enriate TDP rules and regulations pertaining to procedures for competitive selection. our side approves the arrangements set forth in your letter

.

Sincerely,
