

附表一

 The image shows the First Class Atomic Energy Medal. It features a large, multi-pointed starburst design with a central blue circle containing a white atomic symbol. The starburst is surrounded by a ring of smaller, pointed elements. Above the starburst is a circular green medallion with a white atomic symbol. The medal is suspended from a ribbon with vertical stripes of red, white, and blue. To the right of the main medal is a smaller, similar starburst pin.	 The image shows the Second Class Atomic Energy Medal. It features a large, multi-pointed starburst design with a central blue circle containing a white atomic symbol. The starburst is surrounded by a ring of smaller, pointed elements. Above the starburst is a circular green medallion with a white atomic symbol. The medal is suspended from a ribbon with vertical stripes of red, white, and blue. To the right of the main medal is a smaller, similar starburst pin.	 The image shows the Third Class Atomic Energy Medal. It features a large, multi-pointed starburst design with a central blue circle containing a white atomic symbol. The starburst is surrounded by a ring of smaller, pointed elements. Above the starburst is a circular green medallion with a white atomic symbol. The medal is suspended from a ribbon with vertical stripes of red, white, and blue. To the right of the main medal is a smaller, similar starburst pin.
