

Annexed table 1

Assessment of Influential Factors of Critical Telecommunications Infrastructure

Facility	Factors	Risk Level
	No. of affected users (persons)	<input type="checkbox"/> Very high (above 100,000 people)
		<input type="checkbox"/> High (between 10,000 people to 100,000 people)
		<input type="checkbox"/> Medium (between 1,000 people to 10,000 people)
		<input type="checkbox"/> Low (below 1,000 people)
	Economic (operational) loss (TWD)	<input type="checkbox"/> Very high (above 250 million)
		<input type="checkbox"/> High (between 25 million to 250 million)
		<input type="checkbox"/> Medium (between 10 million to 25 million)
		<input type="checkbox"/> Low (below 10 million)
	Functional alternatives for telecommunications infrastructure when the facility fails	<input type="checkbox"/> High (70% of the facility's function cannot be replaced by other facilities)
		<input type="checkbox"/> Medium (70% of the facility's function can be replaced by only one to two facilities)
		<input type="checkbox"/> Low (70% of the facility's function can be replaced by more than two facilities)
	Total	Should a facility receive at least one medium risk level in any factor, it shall be deemed as critical telecommunications infrastructure.
